**BEFORE THE BOARD OF PATENT APPEALS
AND INTERFERENCES**

Application Number: 10/083,170
Filing Date: February 26, 2002
Appellant(s): FORMALE ET AL.

Mark D. Simpson
For Appellant

EXAMINER'S ANSWER

This is in response to the appeal brief filed on 06/23/08 appealing from the Office action mailed 10/31/07.

(1) Real Party in Interest

A statement identifying by name the real party in interest is contained in the brief.

(2) Related Appeals and Interferences

The examiner is not aware of any related appeals, interferences, or judicial proceedings which will directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal.

(3) Status of Claims

The statement of the status of claims contained in the brief is correct.

(4) Status of Amendments After Final

The appellant's statement of the status of amendments after final rejection contained in the brief is correct.

(5) Summary of Claimed Subject Matter

The summary of claimed subject matter contained in the brief is correct.

(6) Grounds of Rejection to be Reviewed on Appeal

The appellant's statement of the grounds of rejection to be reviewed on appeal is correct.

(7) Claims Appendix

The copy of the appealed claims contained in the Appendix to the brief is correct.

(8) Evidence Relied Upon

Chapter Seven (Chapter 7 hereinafter, Disposition Sections 7.1,
<http://www.stanford.edu/dept/U PA/chapter%207.html>)

(9) Grounds of Rejection

The following ground(s) of rejection are applicable to the appealed claims:

Claim Rejections - 35 USC §101

1. 35 U.S.C. §101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 2, 3, 6-10 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter.

3. Based on Supreme Court precedent (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)) and recent Federal Circuit decisions, §101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing (the Supreme Court recognized that this test is not necessarily fixed or permanent and may evolve with technological advances. *Gottschalk v. Benson*, 409 U.S. 63, 71 (1972)).

4. If neither of these requirements is met by the claim(s), the method is not a patent eligible process under 35 U.S.C. §101.

5. In this particular case, regarding the first test, in performing the steps of the claimed subject matter, there is no requirement that a machine be used, thus the claims

Art Unit: 3696

are not considered sufficiently tied to another statutory class. Regarding the second test, since the claimed subject matter may be performed using only human intelligence, the steps do not sufficiently transform the underlying subject matter to be statutory. Thus, to qualify as a 101 statutory method, the claim should positively recite the other statutory class (the thing or product) to which it is tied and should sufficiently transform the underlying subject matter.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of a means plus function limitation has to be defined by the structure disclosed in the specification plus any equivalent of that structure. In the absence of structure disclosed in the specification to perform those functions, the claim limitations would lack specificity. In the present situation, it appears that the means for carrying out the functions recited in claims 11, 14 and 15 are directed to a computer software/algorithm. However, the specification only mentions a central server configured to perform the recited functions with no disclosed algorithm to perform the function. The examiner contends that to claim a means for performing a particular function and then to disclose only a general purpose computer as the structure designed to perform the function in the absence of any algorithm amounts to pure functional claiming. The examiner further contends that because general purpose

Art Unit: 3696

computers i.e., servers can be programmed/configured to perform very different tasks in very different ways, simply disclosing a computer as the structure designated to perform a particular function does not limit the scope of the claim to the corresponding structure as required by section 112th, paragraph 6. Thus, in a means –plus-function claim in which the disclosed structure is a computer, or microprocessor, programmed to carry out an algorithm, the disclosed structure is not the general purpose computer, but rather the special purpose computer programmed to perform the disclosed algorithm.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Chapter Seven (Chapter 7 hereinafter, Disposition Sections 7.1, <http://www.stanford.edu/dept/UPA/chapter%207.html>).

Re claims 1, 2 and 3. Chapter 7 discloses a method of managing assets controlled by members of an organization, said organization having a central server (i.e., CAMS, see pg 2 under OVERVIEW) configured to access data and software systems of said organization (on-line disposal request, see pg 5, line 16), comprising the steps of: identifying one or more of said assets for management (i.e., identify items which are excess, see pg 5 line 27) and submitting an asset disposition request to said central server (i.e., Click “route Disposal request” button to route....and select CAMS DR in

Art Unit: 3696

prism, see pg 7 lines 8-15. The examiner submits that disposal request are routed/submitted to CAMS DR in prism where a DPA supervisor can retrieve the disposal request form for approval); at the central server, automatically, based on receipt of said asset disposition request, obtaining all required approvals for said asset disposition request; (see pg 7 lines 21-42), at the central server automatically, based on said obtaining of all required approvals, effecting said asset disposition request (i.e., PMO will proceed with processing the disposition request, see pg7 line 42); at the central server and automatically modifying said data to reflect said effected disposition request (i.e., update CAMS record with sales/scrap data per SPS disposal report, see pg 12 #8, also see "proper CAMS record can be created, modified or disposed," see pg 5 line 11) (see pgs 1-19).

Re claim 4. Chapter 7 discloses a method wherein said data includes asset inventory data, personnel data, and financial data, and wherein said software systems of said organization include an automated routing system (i.e., prism routing system, see pg 2 under overview) coupled to said asset inventory data, said personnel data, and said financial data, said step of automatically obtaining all required approvals comprising at least the steps of: identifying from said asset inventory data all assets affected by said asset disposition request (i.e., identify items which are excess, see pg 5 line 27); determining from if said identified assets meet a predetermined disposition criteria (see pg 5 lines 26-41, also see pg 9); if said predetermined disposition criteria has been met (see pg 7 line 21), identifying from said personnel data any personnel required to approve said asset disposition request (see pg 7 lines 21-25); requesting approvals

Art Unit: 3696

from said identified personnel using said automated routing system (see pg 7 lines 21-42); and receiving said approvals from said identified personnel using said automated routing system (see pg 7 lines 21-42).

Re claims 5, 6-10. Chapter 7 discloses a method wherein said step of automatically effecting said asset disposition request comprises at least the steps of: changing the control status of identified assets in accordance with said asset disposition request; notifying, using said automated routing system, any member of said organization responsible for effecting said disposition request; receiving, from said member(s) of said organization responsible for effecting said disposition request, confirmation that said asset disposition request has been effected; and notifying, using said automated routing system, all members of said organization affected by said disposition (see pg 7 lines 21-42, also see pg 5 lines 26-41) (see pgs 1-19).

Re claims 11, 12 and 13. Chapter 7 discloses a system for managing assets controlled by members of an organization, said organization having a central server configured to access data and software systems of said organization (on-line disposal request, see pg 5, line 16), comprising: means for identifying one or more of said assets for management (i.e., identify items which are excess, see pg 5 line 27) and submitting an asset disposition request to said central server (i.e., ., Click "route Disposal request" button to route....and select CAMS DR in prism, see pg 7 lines 8-15. The examiner submits that disposal request are routed/submitted to CAMS DR in prism where a DPA supervisor can retrieve the disposal request form for approval); means for automatically, at the central server, based on receipt of said asset disposition request, obtaining all

Art Unit: 3696

required approvals for said asset disposition request (see pg 7 lines 21-42); means for automatically, at the central server, based on said obtaining of all required approvals, effecting said asset disposition request (i.e., PMO will proceed with processing the disposition request, see pg7 line 42); and means for automatically, at the central server, modifying said data to reflect said effected disposition request (i.e., update CAMS record with sales/scrap data per SPS disposal report, see pg 12 #8) (see pgs 1-19)

Re claim 14. Chapter 7 further discloses a system as set forth in claim 11, wherein said data includes asset inventory data, personnel data, and financial data, and wherein said software systems of said organization include an automated routing system (i.e., prism routing system, see pg 2 under overview) coupled to said asset inventory data, said personnel data, and said financial data, said means for automatically obtaining all required approvals comprising at least: means for identifying from said asset inventory data all assets affected by said asset disposition request (i.e., identify items which are excess, see pg 5 line 27, also see pg 7 lines 21-42; means for determining if said identified asset(s) meet a predetermined disposition criteria (see pg 5 lines 28-30); means for identifying from said personnel data, if said predetermined disposition criteria has been met (see pg 5 lines 26-41, also see pg 9), any personnel required to approve said asset disposition request; means for requesting approvals from said identified personnel using said automated routing system (see pg 7 lines 21-42); and means for receiving said approvals from said identified personnel using said automated routing system (see pg 7 lines 21-42).

Re claims 15, 16-20. Chapter 7 further discloses a system, wherein said means for

Art Unit: 3696

automatically effecting said asset disposition request comprises at least: means for changing the control status of identified assets in accordance with said asset disposition request; means for notifying any member of said organization responsible for effecting said disposition request; means for receiving, from said member(s) of said organization responsible for effecting said disposition request, confirmation that said asset disposition request has been effected; and means for notifying all members of said organization affected by said disposition (see pg 7 lines 21-42, also see pg 5 lines 26-41) (see pgs 1-19).

Re claims 21, 22 and 23. Chapter 7 further discloses a computer program product for managing assets controlled by members of an organization, said organization having a central server configured to access data and software systems of said organization, the computer program product comprising a computer-readable storage medium having computer-readable program code embodied in the medium, the computer-readable program code comprising: computer-readable program code that identifies one or more of said assets for management (i.e., identify items which are excess, see pg 5 line 27, also see pg 7 lines 21-42) and submits an asset disposition request to said central server (i.e., ., Click “route Disposal request” button to route....and select CAMS DR in prism, see pg 7 lines 8-15. The examiner submits that disposal request are routed/submitted to CAMS DR in prism where a DPA supervisor can retrieve the disposal request form for approval); computer-readable program code that automatically, based on receipt of said asset disposition request, obtains all required approvals for said asset disposition request (see pg 7 lines 21-42); computer-readable

Art Unit: 3696

program code that automatically, based on said obtaining of all required approvals (i.e., PMO will proceed with processing the disposition request, see pg7 line 42), effects said asset disposition request; and computer-readable program code that automatically modifies said data to reflect said effected disposition request (i.e., update CAMS record with sales/scrap data per SPS disposal report, see pg 12 #8) (see pgs 1-19).

Re claim 24. Chapter 7 discloses a computer program product, wherein said data includes asset inventory data, personnel data, and financial data, and wherein said software systems of said organization include an automated routing system (i.e., prism routing system, see pg 2 under overview) coupled to said asset inventory data, said personnel data, and said financial data, and wherein the computer-readable program code that automatically obtains all required approvals comprises at least: computer-readable program code that identifies from said asset inventory data all assets affected by said asset disposition request; computer-readable program code that determines if said identified assets meet a predetermined disposition criteria; computer-readable program code that (see pg 5 lines 26-41, also see pg 9), if said predetermined disposition criteria has been met, identifies from said personnel data any personnel required to approve said asset disposition request (see pg 7 lines 21-42); computer-readable program code that requests approvals from said identified personnel using said automated routing system; and computer-readable program code that receives said approvals from said identified personnel using said automated routing system (see pg 7 lines 26-41) (see pgs 1-19).

Re claim 25, 26-30. Chapter 7 further discloses a computer program product, wherein

Art Unit: 3696

the computer-readable program code that automatically effects said asset disposition request comprises at least: computer-readable program code that changes the control status of identified assets in accordance with said asset disposition request; computer-readable program code that notifies, using said automated routing system, any member of said organization responsible for effecting said disposition request; computer-readable program code that receives, from said member(s) of said organization responsible for effecting said disposition request, confirmation that said asset disposition request has been effected; and computer-readable program code that notifies, using said automated routing system, all members of said organization affected by said disposition (see pg 7 lines 21-42, also see pg 5 lines 26-41) (see pgs 1-19).

(10) Response to Argument

In Response to the appellant's argument concerning the 35 U.S.C 102(b) rejection of claims 1-30.

Appellant argues in substance that the prior art of record, Chapter 7, fails to disclose a central server or any type of computer that will automatically carry out the process of asset management i.e., automatically obtains all required approvals for asset disposition request, automatically effects asset disposition request, and automatically modifies data to reflect effected disposition request as in the claimed invention. Contrary to the appellant's assertion, Chapter 7 discloses the procedure for processing on-line disposal request. That is to say, Chapter 7 procedure for processing disposal request is fully automated. Chapter 7 further teaches the use of new technology (Oracle Fixed Assets

Art Unit: 3696

i.e., CAMS - capital asset management system) and Prism routing system to process on-line disposal requests (see page 2 under overview). The examiner contends that the Capital Asset Management System – CAMS, as taught by Chapter 7, is clearly akin to the central server claimed by the appellant and it carries out the process of asset management - automatically obtains all required approvals for asset disposition request (i.e., DPA defaults as first approver; your name will be on the "Originator" line and after final review of the information for accuracy and completeness, you will type "Approve" under "Action." Each DR must have DPA supervisor, or higher level second approval; Secondary approvers approve or return DR in Forms Action or in EMS (Electronic Mail) Each DR automatically routes to PMO for final approval (Note: If any approver (DPA Supervisor or PMO) returns DR, the DPA must create new DR in CAMS, (There is a "Copy DR" function in CAMS that allows a rejected DR to be copied and the data modified) Contact .your PSR if assistance is needed. PMO reviews DR and approves or returns (PMO may add remarks). Approved "Sale, prism action is complete etc, see pg 7 lines 21-32), automatically effects asset disposition request (i.e, if there are no restrictions, PMO will proceed with processing the disposition request, see pg7 line 42), and automatically modifies data to reflect effected disposition request (i.e., update CAMS record with sales/scrap data per SPS disposal report, see pg 12 #8, also see "proper CAMS record can be created, modified or disposed," see pg 5 line 11), as in the claimed invention. What is a central server? A central server is nothing but a computer dedicated to a certain purpose. In the present case, that purpose is asset management. Again, Chapter 7 Capital Asset Management System is set up for

Art Unit: 3696

processing on-line disposal requests and is synonymous to the central server claimed by the appellant.

(11) Related Proceeding(s) Appendix

No decision rendered by a court or the Board is identified by the examiner in the Related Appeals and Interferences section of this examiner's answer.

For the above reasons, it is believed that the rejections should be sustained.

This examiner's answer contains a new ground of rejection set forth in section **(9)** above. Accordingly, appellant must within **TWO MONTHS** from the date of this answer exercise one of the following two options to avoid *sua sponte* **dismissal of the appeal** as to the claims subject to the new ground of rejection:

(1) Reopen prosecution. Request that prosecution be reopened before the primary examiner by filing a reply under 37 CFR 1.111 with or without amendment, affidavit or other evidence. Any amendment, affidavit or other evidence must be relevant to the new grounds of rejection. A request that complies with 37 CFR 41.39(b)(1) will be entered and considered. Any request that prosecution be reopened will be treated as a request to withdraw the appeal.

(2) Maintain appeal. Request that the appeal be maintained by filing a reply brief as set forth in 37 CFR 41.41. Such a reply brief must address each new ground of rejection as set forth in 37 CFR 41.37(c)(1)(vii) and should be in compliance with the other requirements of 37 CFR 41.37(c). If a reply brief filed pursuant to 37 CFR 41.39(b)(2) is accompanied by any amendment, affidavit or other evidence, it shall be

Art Unit: 3696

treated as a request that prosecution be reopened before the primary examiner under 37 CFR 41.39(b)(1).

Extensions of time under 37 CFR 1.136(a) are not applicable to the TWO MONTH time period set forth above. See 37 CFR 1.136(b) for extensions of time to reply for patent applications and 37 CFR 1.550(c) for extensions of time to reply for ex parte reexamination proceedings.

Respectfully submitted,

/OJO O OYEBISI/

Examiner, Art Unit 3696

/THOMAS A DIXON/

Supervisory Patent Examiner, Art Unit 3696
